

ASTHMA REGISTER

In accordance with the National Policy on Asthma Management for Schools, it is necessary to formally identify those children who are asthmatics; their normal maintenance medical treatment taken when well and the usual inhalation device; as well as medications used when asthma symptoms develop. A written action plan by the student's doctor is also encouraged so that it can be placed on record.

If the above information refers to your child/children, please complete this form and return as soon as possible to the Class Teacher.

Workplace Health and Safety Officer

Date: _____

Child's name: _____

Class: _____ **Teacher:** _____

1. Describe the normal maintenance medical treatment for Asthma taken when well.
